I am an Information Systems student with experience in software development, data engineering, and AI. I have worked on web systems and automation using Next.js, React, TypeScript, Python, and Node.js, and seek a developer role to apply my technical and problem-solving skills.

Work Experiences

System Developer Intern • Indekstat

October 2025 - January 2026 | Indekstat, South Jakarta

- Boosted operational efficiency up to 60% by engineering an n8n & Python automation pipeline with AI Agents for data processing, address normalization, and Google Sheets workflows.
- Developed and deployed NLP models, using unsupervised clustering to auto-label survey data and RAG to power an intelligent chatbot.

Developer Intern • Universitas Siber Asia

March 2025 - August 2025 | Universitas Siber Asia, South Jakarta

- Contributed to the development and maintenance of the Academic Information System and implementing new features projected to improve system efficiency by an estimated 50%.
- Collaborated with cross-functional teams to ensure continuous improvement of academic services through effective problem-solving and streamlined workflows.

Data Science Intern • Telkom Infranexia

April 2025 - September 2025 | Telkom Infranexia, South Jakarta

- Analyzed and quantified the financial performance of an established energy efficiency system, validating Rp95.6M in first-year savings and confirming a 110% ROI.
- Researched and developed a next-generation AI/ML anomaly detection model, projecting an additional annual saving of Rp19.1M (78% ROI) for future implementation in 2025.
