PROFESSIONAL SUMMARY

Information Systems graduate (GPA 3.90/4.00) with hands-on experience delivering full-stack web systems, data pipelines, and AI/ML automation across 5 professional roles. Currently building enterprise-scale systems for KFC Indonesia as a Full Stack Developer at Hypernet Technologies. Previously engineered automation that boosted operational efficiency by 60%, validated Rp 95.6M in energy cost savings (110% ROI), and contributed to a 50% projected AIS efficiency gain. Certified BNSP Junior Web Developer and Certiport Python IT Specialist. Seeking to grow as a software developer building scalable, impactful systems.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, Java, Go, SQL, HTML, CSS
Frameworks	Next.js, React.js, Angular, Node.js, Express.js, Spring Boot, Gin (Go)
Databases	PostgreSQL, MySQL, Microsoft SQL Server, Oracle, MongoDB, Supabase, Firebase, SQLite, DBeaver
AI / Data	NLP (clustering, RAG, sentiment), LSTM, TabNet, AI Agents, LLM integration, n8n
Tools & DevOps	Git, GitHub, GitLab, Jira, Jasper Reports (PDF), Vercel, Postman, Prisma, Zod, ShadcnUI, Stripe, Clerk, Linux

WORK EXPERIENCE

Full Stack Developer · Hypernet Technologies (Client: KFC Indonesia)

Jun 2026 – Present

Jakarta Raya, Indonesia · Contract · On-site

Stack: Java · Spring Boot · Angular · TypeScript · Golang · Oracle · DBeaver · Jira · Jasper Reports

- Working as Full Stack Developer at PT Hipernet Indodata, assigned to PT Fast Food Indonesia (KFC Indonesia) as the end client.
- Developing and maintaining enterprise-scale systems supporting KFC Indonesia's day-to-day operational needs.

Software Developer Intern · Indekstat

Oct 2025 – Jan 2026

South Jakarta, Indonesia · Contract · Hybrid

Stack: Python · n8n · JavaScript · AI Agents · RAG · NLP

- Engineered an n8n + Python AI Agent automation pipeline for data processing, address normalisation, and Google Sheets workflows — boosting operational efficiency by 60%.
- Developed and deployed NLP models using unsupervised clustering to auto-label ~X00 survey entries per batch, reducing manual tagging time by an estimated 80%.
- Built a RAG-powered internal chatbot using JavaScript, reducing repetitive knowledge queries across the operations team.

Software Developer Intern · Universitas Siber Asia

Mar 2025 – Aug 2025

South Jakarta, Indonesia · Part-time · Remote

Stack: Next.js · React.js · TypeScript · Node.js · Microsoft SQL Server · GitLab

- Developed and maintained new features for the Academic Information System (AIS) serving 5,000+ students, projected to improve system efficiency by ~50%.
- Implemented RESTful APIs using Node.js and integrated Microsoft SQL Server for reliable academic data management; collaborated via GitLab for version control.
- Worked cross-functionally with design, QA, and administration teams to streamline academic service workflows and reduce manual processing.

Data Science Intern · Telkom Infranexia

Apr 2025 – Sep 2025

South Jakarta, Indonesia · Contract · On-site

Stack: Python · Excel · Google Sheets · scikit-learn · pandas

- Analysed financial performance of an operational energy efficiency system across 3 facilities, validating Rp 95.6M in first-year cost savings and confirming a 110% ROI.
- Researched and prototyped an AI/ML anomaly-detection model using Python (scikit-learn, pandas), projecting an additional Rp 19.1M annual saving (78% ROI) upon production rollout.
- Delivered data analysis reports and visualisations using Excel and Google Sheets for executive stakeholder review.

Computer Lab Assistant · Universitas Nasional

Aug 2024 – Oct 2025

Pasar Minggu, Jakarta, Indonesia · Part-time · On-site

Stack: Networking · Linux · Database Administration · JavaScript · Cloud Tools

- Managed day-to-day operation of the university computer lab (networking, database, and cloud track), maintaining equipment and ensuring seamless connectivity for 100+ students per session.
- Troubleshot network and software issues, reducing lab downtime and improving session reliability; contributed to a secure and efficient learning environment.

EDUCATION

Universitas Nasional (UNAS)

2022 – 2026

Bachelor of Information Systems · GPA: 3.90 / 4.00 · Graduated: May 31, 2026

- Best Paper Award — ICETISI 2025 (IEEE): 'An Integrated LSTM-TabNet Ensemble with ElasticNet for Jakarta Composite Index Forecasting', Dec 2025

CERTIFICATIONS & AWARDS

- BNSP Sertifikat Kompetensi — Junior Web Developer · Indonesian Professional Certification Authority · Feb 2026
- IT Specialist: Python · Certiport / CertNexus / Pearson VUE · Nov 2025
- Best Paper Award — ICETISI 2025 · IEEE Indonesia Section · Universitas Nasional · Dec 2025

KEY PROJECTS

- Eclipse Estate — Real estate listings & search platform · Next.js, TypeScript, Supabase, Prisma
- Eclipse Summit — Event management with ticketing, RBAC & Stripe payments · Next.js, TypeScript, Prisma
- Budget Tracker — PWA for personal finance with offline capability & real-time sync · TypeScript
- AI Automation Pipeline — Agentic n8n + Python workflow for NLP survey labelling & reporting · n8n, Python, LLMs
- Sentiment Dashboard — NLP sentiment analytics with custom classification models · Python, Next.js, PostgreSQL

LANGUAGES

Bahasa Indonesia (Native) · English (Proficient — professional working proficiency)
